## ABOUT US

Making healthcare better is our priority, and we believe medical technology can play an even greater role in improving people's lives. With challenges facing families and healthcare systems — such as rising costs, aging populations, and the burden of chronic disease — [we are harnessing the power of technology to take healthcare further.](#)

**Innovation** and collaboration are central to who we are. Since the late 1940s, we have been working with others to alleviate pain, restore health, and extend life. Today, we are a medical technology leader offering therapies and solutions that enable greater efficiency, access, and value — for healthcare systems, providers, and the people they serve.
